

## HRU196 Heritage

The NEW Honda Heritage is available at your Local Honda Power Equipment Dealer now!

### INTRODUCTION

#### CONTRACTOR KING

---

The Honda Heritage lawnmowers boasts many features that lawnmower contractors, landscape contractors and keen gardeners know and love.

---

With an open rear chute design, the Honda Heritage will mow in the most luscious of conditions. The new deck design also helps ensure a full load of grass time after time.

---

Mulching is great for your (or your client's) lawn, with the nutrient-rich grass cuttings being returned to the soil, saving you time as you have fewer stops to empty the catcher. Saved time = extra clients = more profits

---

#### SAFETY AND CONVENIENCE

---

With an integrated snorkel to assist the air filter, the HRU196 Heritage is well prepared to take on the dustiest and harshest of conditions that Australia has to offer.

---

This model features Honda's Mow-Safe® technology in the form of an Engine Brake, which is designed with the safety of the operator and passers-by in mind. With a release of the Engine Brake, the blades and the engine will both stop within three seconds, keeping everyone safe.

---

#### GXV160 = NO WORRIES

---

The Buffalo Classic has a powerful, long-lasting 5.5 horsepower-class engine with cast-iron bore in the form of a GXV160, perfect for harsh Australian conditions. Part of the all-conquering GXV range, and drawing on three decades of GX engine technology, you're in good hands with the GXV.

Of course, like all Honda lawnmowers the Honda Heritage features the "first time every time" easy-start system. The pull cord is attached to the upper handles, so – unlike some competitor mowers – you don't have to bend all the way over to start the mower.

And like all Honda engines, the GXV160 runs on regular unleaded petrol, so there's no need for multiple fuel cans in the garage or mixing oil. Contractors across Australia know that the savings alone from using a Four-Stroke engine like the GXV160 are massive.

## WARRANTY

The Honda Heritage comes standard with a massive 3-year Commercial Engine Warranty in addition to a 4-year Domestic Warranty, giving you complete peace of mind when purchasing your investment.

And it's backed by an informed network of 450 authorised, independent Honda dealers around Australia. So no matter how far from home your work takes you, you'll always be backed up by Honda!

It's no wonder that contractors around Australia are choosing the Honda Heritage as their 19" weapon of choice.

## SPECS

### SPECIFICATIONS

<b>PRODUCT CODE</b>	HRU196 Heritage
